

Anushka Kanoongo

Analytics & Insights Professional · Healthcare

Chicago, IL | [linkedin.com/in/anushkakanoongo](https://www.linkedin.com/in/anushkakanoongo)

PROFESSIONAL SUMMARY

Data-driven Analytics and Insights professional with expertise in healthcare performance analytics, automation, data visualization, and cross-functional collaboration. Proven ability to translate complex datasets into actionable insights that drive strategic and operational impact.

PROFESSIONAL EXPERIENCE

Analytics & Insights Associate — Vizient Inc.

Jul 2024 – Present

Chicago, IL

- Engineered an end-to-end automated validation pipeline in SAS and Excel, cutting manual review time by 40% and enhancing accuracy across multi-domain ambulatory quality and accountability metric releases.
- Developed automated benchmarking scripts in Python, achieving 100% alignment between extract and result datasets and enabling proactive issue detection.
- Built baseline and trend analytics models to evaluate median performance across measures and locations, uncovering insights that guided strategic decision-making.
- Created a custom GPT for knowledge sharing and rapid information access, enabling the team to efficiently lead projects and client engagements.

Healthcare Analytics Fellow — Vizient Inc.

Jun 2023 – Jun 2024

Chicago, IL

- Converted service-line dashboards from MicroStrategy to Power BI, enhancing visual performance reporting for health systems.
- Developed a Tableau readmissions dashboard to communicate outcomes and KPIs to clients.
- Created datasets leveraging risk-model APIs and built a Power BI proof of concept to demonstrate API-driven analytics.
- Automated benchmarking datasets using SQL for executive reports and member dashboards.
- Completed 15+ member requests leveraging clinical data to deliver performance insights and drive process improvement.

Data Management & Operations Co-op — The Resource Group

May 2022 – May 2023

St. Louis, MO

- Developed a dataset and Tableau dashboard providing evidence-based estimated delivery times to improve backorder management.
- Supported SQL-based projects to enhance process efficiency and data standardization.
- Evaluated operational initiatives and workflows to prioritize "Now, Next, Later" strategies aligned with organizational objectives.

Graduate Research Assistant — University of Missouri

Oct 2021 – May 2023

Columbia, MO

- Managed data operations for 75 classes across 20+ schools statewide — collection, cleansing, and reporting to support grant review and program evaluation.
- Led monthly review meetings to assess progress, incorporate feedback, and ensure project alignment.

SKILLS

Data & Query: SQL, SAS, Python, Advanced Excel

BI & Visualization: Power BI, Tableau, MicroStrategy, DAX

Analytics & Domain: Healthcare Performance Analytics, Benchmarking, Data Quality & Automation, Readmissions, CDI, Clinical Data, KPI Reporting

EDUCATION

MS, Health Informatics & Bioinformatics — 4.0 GPA · Graduate Certificate, Healthcare Project Management
University of Missouri – Columbia

MBA, Hospital Administration — 3.5 GPA
Devi Ahilya University, Indore, India
